

## There is Another Choice for Summer School

By: Jared Kiesby  
Math Support Services

Do you want to go on vacation this summer? Maybe you haven't decided yet but you want to leave your options open. One thing is for sure; your child's summer school class could put a halt to any vacation plans you may have been looking forward to.

For as long as anyone can remember the only choice for that vacation ending summer school class has been the local school district and their rigid schedule of classes. The Hart school district has an attendance policy that students are allowed at most three absences. Students who accumulate more than three absences will not be eligible to receive credit in their course regardless of the grade they receive.

Fortunately there is another choice for summer school classes, a choice that has actually been around for 10 years. That choice is Math Support Services. Math Support offers a flexible schedule that allows families to plan their summer class around vacations, sports activities, and other summer camps or workshops. At Math Support Services the focus is on small class sizes and personal attention for each student. Our teachers are fun and energetic and they strive to make the material as interesting as possible.

Math Support offers all high school math and chemistry classes. Both our math and chemistry classes have been approved by the district, and Math Support Services is accredited by both WASC (Western Association of Schools and Colleges) and CITA (Commission on International and Transregional Accreditation). Our classes are also accepted by the University of California system for their A-G class requirements, and we have been approved by the NCAA (National Collegiate Athletic Association).

Math Support also offers a wide variety of skill builder and preparation classes during the summer. Our MFL2K7 (Math For Life 2007) program includes classes for 5<sup>th</sup> & 6<sup>th</sup> graders (Mathletics) and 7<sup>th</sup> and 8<sup>th</sup> graders (Math Maniacs), both of which are designed to be a fun and exciting way to reinforce key math concepts and bridge the gap between elementary school and junior high school, or junior high school and high school. We also offer programs to prepare students for math classes they will be entering in the fall. Math Support Services also features a full assortment of SAT and ACT preparation options including preparation for the SAT II Subject tests.
